## Aquila Tax-Free Fund For Utah

Navigating Changing Market Conditions

Serving Utah investors since 1992

May, 2023

Dear Fellow Shareholder:

The financial markets have a way of reminding us that it isn't always smooth sailing. As history has demonstrated, investments can be influenced to varying degrees by changing market conditions. That's why charting a course for your financial future, and being prepared for inevitable twists and turns, may be important to help one navigate times of volatility and uncertainty. And while the municipal bond market has shown some signs of improvement following a particularly challenging period in 2022, some investors remain leery, wondering what lies ahead. What is the future direction of interest rates? Will inflation continue, or might the economy be headed for a recession? These and other market drivers remain to be seen, which is why we believe it's important to maintain perspective, as well as a long-term focus.

#### What's Driving Fixed Income Markets

The Federal Reserve (the "Fed") remains front and center when to comes to factors that influence fixed income markets, including the municipal bonds in which your Fund invests. The Fed has continued with a "tight" monetary policy in its quest to manage the U.S. economy. The primary tool employed by the Fed has been to increase interest rates, specifically the Federal Funds rate (the rate that banks charge one another to borrow or lend excess reserves overnight). To date, the Federal Reserve has implemented 10 rate hikes since March of 2022, bringing the Fed Funds rate to a 16-year high, and representing the first time that the Fed's target rate has been above 5% since 2007. This has had a significant impact on fixed income securities, including municipal bonds, and continues to work its way through the economy.

As a result, interest rates rose fairly dramatically over the past year. And as interest rates rise (along with the resulting yields on fixed income securities), prices of bonds generally fall commensurately. When rising rates and declining prices occur at a relatively rapid pace, this normally creates a shift in market dynamics, and in the overall tenor among investors.

The Federal Reserve has also engaged in efforts to reduce its balance sheet, as it attempts to combat inflation, while also trying to avoid the possibility of an economic recession. The state of the U.S. economy continues to be another key driver of fixed income markets. Although certain economic indicators suggest a resilient economy, the future direction of the economy remains a question mark. As the Fed attempts to perform a delicate balancing act, market participants are left wondering if the Fed can successfully achieve a so-called "soft landing," or if the economy may slip into a recession.

Additional factors also contribute to market movements. One such example is recent turmoil in the banking industry which resulted in several high-profile bank failures and subsequent takeovers beginning in March. While the bank failures triggered some concern and uncertainty, they did not necessarily appear to have changed the Fed's outlook on the economy. With continued elevated inflation data, the Fed went ahead with yet another rate increase on May 3, 2023. Comments by Fed Chair Jerome Powell at a subsequent news conference did, however, indicate to many market observers that the Fed may push pause on further rate hikes. The markets, of course, will be paying close attention as we approach the Fed's June meeting date, and beyond.

#### The Effect on Municipal Bonds

The municipal bond market is currently being supported by strong credit fundamentals. Generally speaking, municipalities around the country have recorded high levels of tax receipts and added liquidity. Credit conditions appear to be solid even in the face of interest rate volatility. Moreover, credit rating upgrades continued to significantly outpace downgrades through year-end 2022, based on data from Standard & Poor's.

Bond issuance has remained relatively low on a year-over-year basis. The combination of robust tax receipts and federal aid programs have left many municipalities with excess budgets. Additionally, bond issuers remain wary given interest rate changes and overall volatility swings. Issuance is generally expected to pick up as the year progresses, although many believe it is likely to remain rather muted.

#### Maintain a Long-Term Focus

At Aquila Group of Funds, we remain optimistic in the long term for the municipal bond market. Municipal bonds are vital to financing the infrastructure of our local communities and states. Moreover, they may play an important role for investors' asset allocation. We, therefore, believe it's important to keep in mind the key benefits that municipal bond funds offer, particularly during periods of market change and uncertainty.

Your Fund has been specifically designed bearing in mind the fact that most people are more sensitive to potential investment losses than they are eager for outsized gains. Important characteristics of your Fund therefore include:

- **High-quality municipal bonds** Invests in investment-grade bonds; those in the four highest rating categories, or determined to be of comparable credit quality
- Intermediate bond portfolio Seeks to minimize share price volatility or interest rate risk
- **Broad portfolio diversification** Supports a wide range of projects in communities of all sizes throughout your state, not only reducing risk but also improving the quality of life throughout the state
- Local portfolio management Provides an up-close perspective and valuable insights on the issuers and economy in the state

Rest assured that your dedicated team of investment professionals continually draws upon their many years of experience in analyzing securities, observing market and economic cycles, and recognizing risks and opportunities. Our goal is to achieve your Fund's investment objective of delivering the highest level of income exempt from regular federal and state income taxes, as is consistent with preservation of capital.

As always, we encourage you to consult with a trusted financial professional who can help ensure that your investment portfolio remains aligned with your individual needs to meet your long-term financial goals. It's prudent to focus on your goals, your time frame for achieving them, and your tolerance for risk.

Thank you for your investment and continued confidence in Aquila Group of Funds.

Sincerely,

Herrinas

Diana P. Herrmann, Vice Chair and President

Aquila Tax-Free Fund For Utah ANNUAL REPORT Management Discussion Serving Utah investors since 1992

#### Introduction

During the annual reporting period of April 1, 2022 through March 31, 2023, the Federal Reserve (the "Fed") continued the path it began in March 2022 to tighten monetary policy. The Fed rapidly raised interest rates from 50 basis points ("b.p.", one basis point equals 0.01%) beginning March 16, 2022 to the target range of 4.75% – 5.00%, as of your Fund's March 31, 2023 fiscal year end. (On May 3rd, following your Fund's year end, the Fed raised rates an additional 25 b.p. and Fed Chair Jerome Powell's comments at a news conference were generally interpreted by market observers to indicate that the Fed may push pause on further increases.) This increase in interest rates created volatility in the fixed income markets. An example of this volatility is illustrated by the Thomson Reuters Municipal Market Data ("MMD") AAA 10-year maturity yield which was 2.18% on April 1, 2022, reached its highest yield on October 27, 2022 of 3.41%, before settling in at a yield of 2.27% on March 31, 2023.

The Aquila Group of Funds ("AGOF") single state municipal bond funds have consistently believed that a high quality, intermediate fund strategy helps to mitigate interest rate volatility. The AGOF single state funds generally performed well versus longer, lower rated national funds during the fiscal year ended March 31, 2023. It appears the high quality intermediate sector was one of the best performing municipal sectors during this time.

Throughout 2023 we believe there will be interest in how the Fed will respond to the economic conditions facing the United States. The "soft landing" versus a recession continues to be debated among economists. As this debate continues, Congress is currently busy trying to solve the debt ceiling issue with the Administration. Any fiscal stimulus that could increase inflation will be a major point of contention between the legislative and executive branches of government. As a result of this uncertainty, there may be market opportunities that the Aquila Group of Funds can implement to mitigate interest rate volatility.

#### **U.S. Economy**

Inflation, and how the Federal Reserve responds, remain the key macroeconomic topics. The era of low interest rates has come to an end, as the Fed continues to raise rates in its fight against inflation. As of the year ended March 31, 2023, the Fed had hiked rates nine straight times since it met on March 16, 2022, including March 22, 2023. (And, a 10th increase was implemented on May 3, 2023.) Although yields have risen from their lows, rates remain well below current inflation levels, as inflation over the past year has been running at its fastest pace in decades. U.S. Treasury yields rose and began to invert in April, 2022 and the Treasury yield curve continues to maintain its distinctly inverted shape. The impact on rates of the Fed's battle has been astonishing with 2-year Treasury yields increasing 428 b.p. from, March 31, 2022 to 5.06% as of March 8, 2023 and the 30-year U.S. Treasury rose 200 b.p. to 4.02%, as of the beginning of March 2023.

Rising interest rates have also significantly impacted bank portfolios. Deposits in the U.S. banking system rapidly increased by \$5.2 trillion from 2019 to the end of 2021, following the onset of the COVID-19 pandemic. However, loan volumes did not keep pace with deposits due to the uncertainty created by the pandemic. As a result, banks added to their securities portfolios and loans as their share of total asset base decreased until 2022. Prior to the sharp increase in interest rates last year, banks were holding elevated levels of long-dated fixed income securities purchased with lower yields, which incurred substantial mark-to-market losses as rates increased. Toward the end of February 2023, Federal Deposit Insurance Corporation (FDIC) Chair, Martin Gruenberg, made cautionary statements regarding the impact higher rates could have on the banking sector and on bank unrealized losses. Two weeks later, Silicon Valley Bank ("SVB"), which was the 16th largest commercial bank in the U.S., collapsed following a run on deposits. The failure of SVB and two other banks prompted the Fed to create an emergency lending facility. Moody's Investor Service has since lowered its outlook on the U.S. banking system to "Negative" from "Stable", citing the "rapidly deteriorating operating environment."

The Fed's outlook continues to favor additional interest rate hikes as it seeks to contain current inflation levels and the recent banking crisis. Two main takeaways from recent inflation data are that inflation remains both too high relative to the Fed's 2% target and the rate of inflation has shown signs of decelerating. This slowing began in October 2022, with the release of Consumer Price Index ("CPI") data. More recently, CPI data released in March 2023 reported the all items CPI increased 5.0% year-to-date, the smallest 12-month gain since May 2021. However, the largest contributor to the increase was the cost of shelter, which remains a concern. Although supply chains have shown signs of recovery, the war in Ukraine continues to pressure commodities and energy prices. Furthermore, recently announced production cuts by the oil cartel OPEC (Organization of the Petroleum Exporting Countries) and its allies have placed upward pressure on the energy components of CPI.

#### **Municipal Market**

The past year through the period ending March 31, 2023, was an exceptionally challenging year for municipal bonds, with the Bloomberg Municipal Bond Index\*, a broad measure of the overall municipal bond market, performance declining 8.53%, reporting its worst annual performance since 1980. The 10-Year Bloomberg AAA municipal yield more than doubled during the reporting period, from 1.05% on March 31, 2022 to 2.62% on December 31, 2022, to finish up the 12-month period at 2.26% on March 31, 2023. The Bloomberg Municipal Bond Index returns turned positive in the fourth quarter of 2022 and ended-up delivering a 2.20% return in March 2023, the strongest March performance since 2008. As of March 31, 2023, the overall municipal bond market had actually recovered to produce a positive total return for the trailing twelve-month period with the Bloomberg Municipal Bond Index eking out a positive 0.26% total return from March 31, 2022 to March 31, 2023.

One of the most significant developments in the municipal bond market over the past year has been the decline in new issuance. Over the first quarter of 2023, new issuance declined a dramatic 23.8% after falling 21.3% for calendar-year 2022. This lack of new issue supply has made sourcing bonds more challenging. The decline in new issuance is primarily due to the substantial increase in interest rates and the accelerated pace of rate hikes over this past year. This lower new issue environment has resulted in a positive credit trend for municipals, given many local governments are sitting on significant

#### 2 | Aquila Tax-Free Fund For Utah

amounts of federal pandemic relief cash and running budget surpluses. In addition, taxable municipal yields have risen in parallel with U.S. Treasury yields, which has rendered many taxable municipal refunding bonds uneconomical. As a result, national taxable municipal issuance was approximately 59% of last year's issuance over the same period ending March 31, 2023.

However, declining new issue volume trends have been largely offset by a surge in secondary market trading. In 2022, the overall number of trades rose by 66% from 2021 and 17% higher than the previous high reached in 2008, during the Credit Crisis. The total par value of fixed rate municipal securities traded in 2022 totaled \$2.5 trillion, over 7x the amount of new issue volume during the year. This was 40% above the \$1.6 trillion in total par value traded in 2021. This secondary market environment can be advantageous to the active portfolio efforts that professional municipal bond mutual fund managers seek to exploit on behalf of their shareholders.

With low new issuance and elevated secondary market trading activity, it is not surprising that demand for municipal bonds remains high. The demand for municipal bonds can be seen in the ratio of municipal yields versus U.S. Treasury yields. As of March 31, 2023, the 5-year maturity range of 'AAA' rated municipals was yielding 61% of U.S. Treasuries, which compares to 81% as of March 31, 2022. For the 10-year maturity range, municipals were yielding 65% of U.S. Treasuries as of March 31, 2023, compared to 94% as of March 31, 2022. While these ratios can be primarily attributed to high demand in a low issuance market, they are also an indication of the value of the tax-exemption offered by municipal bonds and the credit quality of the municipal asset class in the wake of the banking crisis and current recession concerns.

Credit quality in the municipal sector remains high, although there are specific pockets of concern. The uncertainty experienced in the banking sector last month reinforced the concept that investors view municipal bonds, particularly investment grade state and local government issuers, as high-quality investments. This strong perception of credit quality can largely be attributed to the unprecedented level of federal stimulus programs related to the pandemic and local government budgeting practices, which tend to be risk averse. However, there are certain sectors, such as assisted living and student housing, where investors are typically more cautious when investing.

#### **Utah State Economy**

The State of Utah has benefitted from a strong economy. In 2022, Utah's Gross Domestic Product ("GDP") reached over \$185 billion, which was a 3.7% increase over 2021. The five largest industries that contributed to Utah's GDP were:

• [	Drug,	Cosmetic	Who	lesal	ing:	\$21	bill	ion
-----	-------	----------	-----	-------	------	------	------	-----

- E-commerce, Online Auctions: \$11 billion
- New Car Dealers: \$11 billion
- Grocery Wholesaling: \$11 billion
- Petroleum Refining: \$11 billion

Employment growth rate can also be an indication of the health of the economy. Faster employment growth rates typically indicate a growing economy. High employment and low unemployment rates typically indicate a tight labor market. Utah's employment growth has expanded at an annualized rate of 4.5% from 2017 to 2022. The labor growth rate is evident in Utah's GDP growth rate of 3.7%. While the State's economy continues to experience expansion, the low 2022 unemployment rate of 2.2% shows how tight the labor market remains in Utah.

Utah's per capita disposable income stood at \$55,000 for 2022, which was below the national average of \$56,000 but represented an increase from the \$49,291 reported in 2021. The per capita disposable income growth has followed the economic growth of the State. An increase in disposable income is typically an indication that households have more money to save or spend.

Construction spending is a sign of the future health of the economy, resulting from the creation of jobs, income and other tax revenue. 2021 was a record year for aggregate construction spending. And, while 2022's aggregate construction spending was slightly lower, it exceeded all prior years with the exception of 2021. Utah's non-residential construction was \$3.26 billion for 2022, an increase of 11% over 2021. In 2022, the value of Utah residential construction on the other hand totaled \$7.10 billion, nearly 20% lower than the record \$8.85 billion in 2021.

#### **Fund Performance**

#### **Aquila Tax Free Fund For Utah Performance:**

	March 31, 2023
	1-Year Total Return
Class A Share (without sales charge)	0.01%
Class Y Share	0.12%
Bloomberg Municipal Bond Quality Intermediate Index	2.04%

#### Aquila Tax-Free Fund For Utah Portfolio Characteristics:

	March 31, 2022	March 31, 2023
Weighted Average Maturity	9.77 yrs.	9.54 yrs.
Effective Duration	4.83 yrs.	4.63 yrs.
Modified Duration	4.58 yrs.	4.33 yrs.

#### **Bloomberg Municipal Bond Quality Intermediate Index Characteristics:**

	March 31, 2022	March 31, 2023
Weighted Average Maturity	6.34 yrs.	6.46 yrs.
Effective Duration	4.12 yrs.	4.00 yrs.
Modified Duration	3.86 yrs.	3.80 yrs.

Aquila Tax-Free Fund For Utah (the "Fund") Class Y Shares underperformed the Bloomberg Municipal Bond Quality Intermediate Index (the "Index") for the fiscal year April 1, 2022 through March 31, 2023. It should be noted that the Index does not include any operating expenses nor sales charges, and being nationally oriented, does not reflect state-specific bond market performance. The Fund's longer duration during the rising rate

environment throughout 2022 as well as the Fund's cash balances, were the main reasons for the underperformance versus the Index.

#### **Outlook and Strategy**

The interest rate volatility of the past year has given your Fund the opportunity to demonstrate the importance of a locally managed, high quality, intermediate fund by being able to mitigate interest rate volatility. As of March 31, 2023, the Fund had over 76% of bonds rated "AA", including 2.00% Pre-Refunded securities. Although there are reciprocal states the Fund is able to invest in and still keep the double-tax exempt status, we focus on investing in Utah credits with over 76% of the Fund invested in local Utah credits through the period ending March 31, 2023. The Fund's high quality, intermediate structure has provided the liquidity necessary for cash management and market opportunities.

We believe our current fund maturity and duration exposure leaves us in a desirable position to respond to any favorable shifts that may occur in the yield curve and credit spreads as monetary policy continues to unfold. The volatility the municipal market has experienced in the past quarter may likely continue if the Federal Reserve continues with their strategy of increasing interest rates, along with inflation at recent elevated levels. These periods can introduce valuable opportunities to leverage our demonstrated active management techniques that have enabled the Fund to limit erosion in the monthly distributions, while maintaining a conservative intermediate maturity position.

#### Mutual fund investing involves risk and loss of principal is possible.

The global pandemic of the novel coronavirus respiratory disease designated COVID-19 has resulted in major disruption to economies and markets around the world, including the United States. Global financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted. Liquidity for many instruments has been greatly reduced for periods of time. Some sectors of the economy and individual issuers have experienced particularly large losses. These circumstances may continue to affect adversely the value and liquidity of the Fund's investments. Following Russia's invasion of Ukraine, Russian securities have lost all, or nearly all, their market value. Other securities or markets could be similarly affected by past or future geopolitical or other events or conditions.

<sup>\*</sup> Source: Bloomberg Index Services Limited. BLOOMBERG® is a trademark and service mark of Bloomberg Finance L.P. and its affiliates (collectively "Bloomberg"). Bloomberg or Bloomberg's licensors own all proprietary rights in the Bloomberg Indices. Bloomberg does not approve or endorse this material or guarantee the accuracy or completeness of any information therein, nor does Bloomberg make any warranty, express or implied, as to results to be obtained therefrom, and, to the maximum extent allowed by the law, Bloomberg shall not have any liability or responsibility for any injury or damages arising in connection therewith.

The market prices of the Fund's securities may rise or decline in value due to general market conditions, such as real or perceived adverse economic, political or regulatory conditions, recessions, inflation, changes in interest rates, lack of liquidity in the bond markets, the spread of infectious illness or other public health issues, armed conflict including Russia's military invasion of Ukraine, sanctions against Russia, other nations or individuals or companies and possible countermeasures, market disruptions caused by tariffs, trade disputes or other factors, or adverse investor sentiment. When market prices fall, the value of your investment may go down. In the past several years, financial markets have experienced increased volatility, depressed valuations, decreased liquidity and heightened uncertainty. These conditions may continue, recur, worsen or spread. Recently, inflation and interest rates have increased and may rise further. These circumstances could adversely affect the value and liquidity of the Fund's investments, impair the Fund's ability to satisfy redemption requests, and negatively impact the Fund's performance. Raising the ceiling on U.S. government debt has become increasingly politicized. Any failure to increase the ceiling on U.S. government debt could lead to a default on U.S. government obligations, with unpredictable consequences for economies and markets.

Governments and central banks, including the U.S. Federal Reserve, have taken extraordinary and unprecedented actions to support local and global economies and the financial markets. These actions have resulted in significant expansion of public debt, including in the U.S. The consequences of high public debt, including its future impact on the economy and securities markets, may not be known for some time.

The U.S. and other countries are periodically involved in disputes over trade and other matters, which may result in tariffs, investment restrictions and adverse impacts on affected companies and securities. For example, the U.S. has imposed tariffs and other trade barriers on Chinese exports, has restricted sales of certain categories of goods to China, and has established barriers to investments in China. Trade disputes may adversely affect the economies of the U.S. and its trading partners, as well as companies directly or indirectly affected and financial markets generally. If the political climate between the U.S. and China does not improve or continues to deteriorate, if China were to attempt unification of Taiwan by force, or if other geopolitical conflicts develop or get worse, economies, markets and individual securities may be severely affected both regionally and globally, and the value of the Fund's assets may go down.

The value of your investment will generally go down when interest rates rise. A rise in interest rates tends to have a greater impact on the prices of longer term or longer duration securities. In recent years, interest rates and credit spreads in the U.S. have been at historic lows. The U.S. Federal Reserve has raised certain interest rates, and interest rates may continue to go up. A general rise in interest rates may cause investors to move out of fixed income securities on a large scale and could also result in increased redemptions from the Fund.

Investments in the Fund are subject to possible loss due to the financial failure of the issuers of underlying securities and their inability to meet their debt obligations.

The value of municipal securities can be adversely affected by changes in the financial condition of one or more individual municipal issuers or insurers of municipal issuers, regulatory developments, legislative actions, and by uncertainties and public perceptions concerning these and other factors. The Fund may be affected significantly by adverse economic, political or other events affecting state and other municipal issuers in which it invests, and may be more volatile than a more geographically diverse fund. The municipal bond market can be susceptible to unusual volatility, particularly for lower-rated and unrated securities. Liquidity can be reduced unpredictably in response to overall economic conditions or credit tightening. Municipal issuers may be adversely affected by rising health care costs, increasing unfunded pension liabilities, and by the phasing out of federal programs providing financial support. Unfavorable conditions and developments relating to projects financed with municipal securities may be more susceptible to downgrades or defaults during a recession or similar periods of economic stress. Financial difficulties of municipal issuers may continue or get worse, particularly in the event of political, economic or market turmoil or a recession.

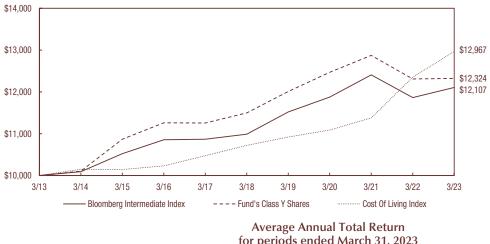

A portion of income may be subject to local, state, Federal and/or alternative minimum tax. Capital gains, if any, are subject to capital gains tax.

#### These risks may result in share price volatility.

Any information in this Annual Report regarding market or economic trends or the factors influencing the Fund's historical or future performance are statements of opinion as of the date of this report. These statements should not be relied upon for any other purposes. Past performance is no guarantee of future results, and there is no guarantee that any market forecasts discussed will be realized.

#### PERFORMANCE REPORT

The following graph illustrates the value of \$10,000 invested in the Class Y shares of Aquila Tax-Free Fund For Utah (the "Fund") for the 10-year period ended March 31, 2023 as compared with the Bloomberg Municipal Bond: Quality Intermediate TR Unhedged Index\*\* (the "Bloomberg Intermediate Index") and the Consumer Price Index (a cost of living index). The performance of each of the other classes is not shown in the graph but is included in the table below. It should be noted that the Bloomberg Intermediate Index does not include any operating expenses nor sales charges, and being nationally oriented, does not reflect state-specific bond market performance for the limited number of states in which Aquila Tax-Free Fund For Utah may invest.

	_ 101 periods ended March 51, 2025		51, 2025

#### **REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

## To the Trustees of Aquila Municipal Trust and the Shareholders of Aquila Tax-Free Fund For Utah:

#### **Opinion on the Financial Statements**

We have audited the accompanying statement of assets and liabilities of Aquila Tax-Free Fund For Utah (the "Fund"), including the schedule of investments, as of March 31, 2023, the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and financial highlights for each of the five years in the period then ended, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund as of March 31, 2023, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and its financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

#### **Basis for Opinion**

These financial statements are the responsibility of the Fund's management. Our responsibility is to express an opinion on the Fund's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We have served as the auditor for the Trust since 2005.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Fund is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audit we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control over financial reporting. Accordingly, we express no such opinion.

Our audit included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of March 31, 2023 by correspondence with the custodian. We believe that our audit provides a reasonable basis for our opinion

#### PORTFOLIO ABBREVIATIONS

AGMC - Assured Guaranty Municipal Corp. AMBAC - American Municipal Bond Assurance Corp. AMT - Alternative Minimum Tax BAMAC - Build America Mutual Assurance Co. BAMI - Build America Mutual Insurance COP - Certificates of Participation ETM - Escrowed to Maturity FHA - Federal Housing Administration IHC - Intermountain Health Care NR - Not Rated PSF - Permanent School Fund VRDO – Variable Rate Demand Obligation

- \* Any security not rated ("NR") by any of the Nationally Recognized Statistical Rating Organizations ("NRSRO") has been determined by the Investment Adviser to have sufficient quality to be ranked in the top four credit ratings if a credit rating were to be assigned by a NRSRO.
- \*\* The rate is an annualized seven-day yield at period end.
- \*\*\* Variable rate demand obligations (VRDOs) are payable upon demand within the same day for securities with daily liquidity or seven days for securities with weekly liquidity.
- + Where applicable, calculated using the highest rating of the three NRSRO. Percentages in this table do not include the Short-Term Investment.
- ++ Pre-refunded bonds are bonds for which U.S. Government Obligations usually have been placed in escrow to retire the bonds at their earliest call date. Escrowed to Maturity bonds are bonds where money has been placed in the escrow account which is used to pay principal and interest through the bond's originally scheduled maturity date. Escrowed to Maturity are shown as ETM. All other securities in the category are pre-refunded.

Note: 144A – Security exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At March 31, 2023, these securities amounted to a value of \$12,989,871 or 3.9% of net assets.

# 1. Organization

Aguila Tax-Free Fund For Utah (the "Fund") is one of six series of Aguila Municipal Trust, a Massachusetts business trust registered under the Investment Company Act of 1940 (the "1940 Act") as a non-diversified, open-end management investment company. The Fund, which commenced operations on October 12, 2013, is the successor to Tax-Free Fund For Utah. Tax-Free Fund For Utah transferred all of its assets and liabilities in exchange for shares of the Fund on October 11, 2013 pursuant to an agreement and plan of reorganization (the "reorganization"). The reorganization was approved by shareholders of Tax-Free Fund For Utah on September 17, 2013. The reorganization was accomplished by exchanging the assets and liabilities of the predecessor fund for shares of the Fund. Shareowners holding shares of Tax-Free Fund For Utah received corresponding shares of the Fund in a one-to-one exchange ratio in the reorganization. Accordingly, the reorganization, which was a tax-free exchange, had no effect on the Fund's operations. The Fund is authorized to issue an unlimited number of shares. Class A Shares are sold at net asset value plus a sales charge of varying size (depending upon a variety of factors) paid at the time of purchase and bear a distribution fee. Class C Shares are sold at net asset value with no sales charge payable at the time of purchase but with a level charge for service and distribution fees for six years thereafter. Class C Shares automatically convert to Class A Shares after six years. Class F Shares and Class Y Shares are sold only through authorized financial institutions acting for investors in a fiduciary, advisory, agency, custodial or similar capacity, and are not offered directly to retail customers. Class F Shares and Class Y Shares are sold at net asset value with no sales charge, no redemption fee, no contingent deferred sales charge ("CDSC") and no distribution fee. All classes of shares represent interests in the same portfolio of investments and are identical as to rights and privileges but differ with respect to the effect of sales charges, the distribution and/or service fees borne by each class, expenses specific to each class, voting rights on matters affecting a single class and the exchange privileges of each class.

# 2. Significant Accounting Policies

The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements. The policies are in conformity with accounting principles generally accepted in the United States of America for investment companies.

a) Portfolio valuation: Municipal securities are valued each business day based upon information provided by a nationally prominent independent pricing service and periodically verified through other pricing services. In the case of securities for which market quotations are readily available, securities are valued by the pricing service at the mean of bid and ask quotations. If a market quotation or a valuation from the pricing service is not readily available, the security is valued using other fair value methods. Rule 2a-5 under the 1940 Act provides that in the event that market quotations are not readily available, such securities must be valued at their fair value as determined in good faith by each Fund's Board of Trustees. Rule 2a-5

further provides that the Board may choose to designate a "valuation designee" to perform the fair value determination. The Aquila Municipal Trust Board has designated Aquila Investment Management LLC as the valuation designee (the "Valuation Designee") to determine the fair value of Fund securities in good faith. Aquila Investment Management LLC as Valuation Designee, selects an appropriate methodology or methodologies for determining and calculating the fair value of Fund investments and applies such methodology or methodologies in a consistent manner, including specifying the key inputs and assumptions specific to each asset class or portfolio holding.

*b) Fair value measurements:* The Fund follows a fair value hierarchy that distinguishes between market data obtained from independent sources (observable inputs) and the Fund's own market assumptions (unobservable inputs). These inputs are used in determining the value of the Fund's investments and are summarized in the following fair value hierarchy:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access.

Level 2 – Observable inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates and similar data.

Level 3 – Unobservable inputs for the asset or liability, to the extent relevant observable inputs are not available, representing the Fund's own assumptions about the assumptions a market participant would use in valuing the asset or liability, based on the best information available.

The inputs or methodology used for valuing securities are not an indication of the risk associated with investing in those securities.

The following is a summary of the valuation inputs, representing 100% of the Fund's investments, used to value the Fund's net assets as of March 31, 2023:

Valuation Inputs*		Investments in Securities
Level 1 – Quoted Prices — Short-Term Investment	\$	6,433,153
Level 2 – Other Significant Observable Inputs — Municipal Bonds*		321,966,561
Level 3 – Significant Unobservable Inputs		
Total	<u>\$</u>	328,399,714

\* See schedule of investments for a detailed listing of securities.

- c) *Subsequent events*: In preparing these financial statements, the Fund has evaluated events and transactions for potential recognition or disclosure through the date these financial statements were issued.
- d) Securities transactions and related investment income: Securities transactions are recorded on the trade date. Realized gains and losses from securities transactions are reported on the identified cost basis. Interest income is recorded daily on the accrual basis and is adjusted for amortization of premium and accretion of original issue and market discount.
- e) *Federal income taxes*: It is the policy of the Fund to continue to qualify as a regulated investment company by complying with the provisions of the Internal Revenue Code applicable to certain investment companies. The Fund intends to make distributions of income and securities profits sufficient to relieve it from all, or substantially all, Federal income and excise taxes.

Management has reviewed the tax positions for each of the open tax years (2020 - 2022) or expected to be taken in the Fund's 2023 tax returns and has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements.

- f) *Multiple class allocations*: All income, expenses (other than class-specific expenses), and realized and unrealized gains or losses are allocated daily to each class of shares based on the relative net assets of each class. Class-specific expenses, which include distribution and service fees and any other items that are specifically attributed to a particular class, are also charged directly to such class on a daily basis.
- g) Use of estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.
- h) *Reclassification of capital accounts*: Accounting principles generally accepted in the United States of America require that certain components of net assets relating to permanent differences be reclassified between financial and tax reporting. These reclassifications had no effect on net assets or net asset value per share. For the year ended March 31, 2023, there were no items identified that have been reclassified among components of net assets.
- i) The Fund is an investment company and accordingly follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board ("FASB") Accounting Standard Codification Topic 946 "Financial Services-Investment Companies".

#### 3. Fees and Related Party Transactions

#### a) Management Arrangements:

Aquila Investment Management LLC (the "Manager"), a wholly-owned subsidiary of Aquila Management Corporation, the Fund's founder and sponsor, serves as the Manager for the Fund under an Advisory and Administration Agreement with the Fund. Under the Advisory and Administration Agreement, the Manager provides all investment management and administrative services to the Fund. The Manager's services include providing the office of the Fund and all related services as well as managing relationships with all the various support organizations to the Fund such as the transfer and shareholder servicing agent, custodian, legal counsel, fund accounting agent, auditors and distributor. For its services, the Manager is entitled to receive a fee which is payable monthly and computed as of the close of business each day at the annual rate of 0.50% on the Fund's net assets.

The Manager has contractually undertaken to waive its fees so that management fees are equivalent to 0.48 of 1% of net assets of the Fund up to \$400,000,000; 0.46 of 1% of net assets above \$400,000,000 up to \$1,000,000,000; and 0.44 of 1% of net assets above \$1,000,000,000. This contractual undertaking is currently in effect until September 30, 2023. The Manager may not terminate the arrangement without the approval of the Board of Trustees. For the year ended March 31, 2023, the Fund incurred management fees of \$1,849,882 of which \$74,503 was waived.

Under a Compliance Agreement with the Manager, the Manager is compensated by the Fund for compliance related services provided to enable the Fund to comply with Rule 38a-1 of the Investment Company Act of 1940, as amended (the "1940 Act").

Specific details as to the nature and extent of the services provided by the Manager are more fully defined in the Fund's Prospectus and Statement of Additional Information.

### b) Distribution and Service Fees:

The Fund has adopted a Distribution Plan (the "Plan") pursuant to Rule 12b-1 (the "Rule") under the 1940 Act. Under one part of the Plan, with respect to Class A Shares, the Fund is authorized to make distribution fee payments to broker-dealers or others ("Qualified Recipients") selected by Aquila Distributors LLC (the "Distributor") including, but not limited to, any principal underwriter of the Fund, with which the Distributor has entered into written agreements contemplated by the Rule and which have rendered assistance in the distribution and/or retention of the Fund's shares or servicing of shareholder accounts. The Fund makes payment of this distribution fee at the annual rate of 0.20% of the Fund's average net assets represented by Class A Shares. For the year ended March 31, 2023, distribution fees on Class A Shares amounted to \$392,394, of which the Distributor retained \$15,278.

Under another part of the Plan, the Fund is authorized to make payments with respect to Class C Shares to Qualified Recipients which have rendered assistance in the distribution and/or retention of the Fund's Class C shares or servicing of shareholder accounts. These payments are made at the annual rate of 0.75% of the Fund's average net assets represented by Class C Shares. For the year ended March 31, 2023, these payments amounted to \$91,315. In addition, under a Shareholder Services Plan, the Fund is authorized to make service fee payments with respect to Class C Shares to Qualified Recipients for providing personal services and/or maintenance of shareholder accounts. These payments are made at the annual rate of 0.25% of the Fund's average net assets represented by Class C Shares and for the year ended March 31, 2023, amounted to \$30,439. The total of these payments with respect to Class C Shares amounted to \$121,754, of which the Distributor retained \$29,883.

Specific details about the Plans are more fully defined in the Fund's Prospectus and Statement of Additional Information.

Under a Distribution Agreement, the Distributor serves as the exclusive distributor of the Fund's shares. Through agreements between the Distributor and various brokerage and advisory firms ("financial intermediaries"), the Fund's shares are sold primarily through the facilities of these financial intermediaries having offices within Utah, with the bulk of any sales commissions inuring to such financial intermediaries. For the year ended March 31, 2023, total commissions on sales of Class A Shares amounted to \$38,442, of which the Distributor received \$12,423.

c) Transfer and shareholder servicing fees:

The Fund occasionally compensates financial intermediaries in connection with the sub-transfer agency related services provided by such entities in connection with their respective Fund shareholders so long as the fees are deemed by the Board of Trustees to be reasonable in relation to (i) the value of the services and the benefits received by the Fund and certain shareholders; and (ii) the payments that the Fund would make to another entity to perform similar ongoing services to existing shareholders.

# 4. Purchases and Sales of Securities

During the year ended March 31, 2023, purchases of securities and proceeds from the sales of securities aggregated \$44,787,245 and \$137,080,985, respectively.

At March 31, 2023, the aggregate tax cost for all securities was \$335,716,072. At March 31, 2023, the aggregate gross unrealized appreciation for all securities in which there is an excess of value over tax cost amounted to \$1,981,848 and aggregate gross unrealized depreciation for all securities in which there is an excess of tax cost over value amounted to \$9,298,206, for a net unrealized depreciation of \$7,316,358.

### 5. Portfolio Orientation

At least 50% of the Fund's assets will always consist of obligations of Utah-based issuers. At March 31, 2023, the Fund had 76% of its portfolio holdings invested in municipal obligations of issuers within Utah. The Fund is also permitted to invest in tax-free municipal obligations of non-Utah-based issuers that are exempt from regular Federal income taxes and, pursuant to Utah statutory authority, the interest on which is currently exempt from Utah individual income taxes. There can be no certainty as to the ongoing exemption from Utah individual income tax of the interest of non-Utah-based issuers. Since the Fund invests principally and may invest entirely in double tax-free municipal obligations of issuers within Utah, it is subject to possible risks associated with economic, political, or legal developments or industrial or regional matters specifically affecting Utah and whatever effects these may have upon Utah issuers' ability to meet their obligations.

# 6. Trustees' Fees and Expenses

At March 31, 2023, there were 9 Trustees, one of whom is affiliated with the Manager and is not paid any fees. The total amount of Trustees' service fees (for carrying out their responsibilities) and attendance fees paid during the year ended March 31, 2023 was \$112,622. Attendance fees are paid to those in attendance at regularly scheduled quarterly Board Meetings and meetings of the Independent Trustees held prior to each quarterly Board Meeting, as well as additional meetings (such as Audit, Nominating, Shareholder and special meetings). Trustees are reimbursed for their expenses such as travel, accommodations and meals incurred in connection with attendance at Board Meetings and the Annual Meeting of Shareholders. For the year ended March 31, 2023, due to the COVID-19 pandemic, such meeting-related expenses were reduced and amounted to \$4,327.

# 7. Capital Share Transactions

Transactions in Capital Shares of the Fund were as follows:

		Ended 31, 2023		Ended 31, 2022

### 8. Securities Traded on a When-Issued Basis

The Fund may purchase or sell securities on a when-issued basis. When-issued transactions arise when securities are purchased or sold by the Fund with payment and delivery taking place in the future in order to secure what is considered to be an advantageous price and yield to the Fund at the time of entering into the transaction. These transactions are subject to market fluctuations and their current value is determined in the same manner as for other securities.

### 9. Income Tax Information and Distributions

The Fund declares dividends daily from net investment income and makes payments monthly. Net realized capital gains, if any, are distributed annually and are taxable. These distributions are paid in additional shares at the net asset value per share or in cash, at the shareholder's option.

The Fund intends to maintain, to the maximum extent possible, the tax-exempt status of interest payments received from portfolio municipal securities in order to allow dividends paid to shareholders from net investment income to be exempt from regular Federal and State of Utah income taxes. Due to differences between financial statement reporting and Federal income tax reporting requirements, distributions made by the Fund may not be the same as the Fund's net investment income, and/or net realized securities gains. Further, a small portion of the dividends may, under some circumstances, be subject to taxes at ordinary income rates. For certain shareholders some dividend income may, under some circumstances, be subject to the Alternative Minimum Tax. As a result of the passage of the Regulated Investment Company Act of 2010 (the "Act"), losses incurred in this fiscal year and beyond retain their character as short-term or long-term, have no expiration and are utilized before capital losses incurred prior to the enactment of the Act. At March 31, 2023, the Fund had capital loss carry forwards of \$9,830,586 of which \$4,108,410 retains its character of shortterm and \$5,722,176 retains its character of long-term; both have no expiration. As of March 31, 2023, the Fund had post-October losses of \$1,721,327, which is deferred until fiscal 2023 for tax purposes.

The tax character of distributions was as follows:

	Year Ended		Y	'ear Ended
	March 31, 2023		Ma	rch 31, 2022
Net tax-exempt income	\$	8,033,612	\$	8,551,851
Ordinary Income		90,734		837
	\$	8,124,346	\$	8,552,688

As of March 31, 2023, the components of distributable earnings on a tax basis were:

Undistributed tax-exempt income	\$ 93,557
Accumulated net realized loss on investments	(9,830,586)
Unrealized depreciation	(7,316,358)
Post October losses	(1,721,327)
Other temporary differences	 (92,988)
	\$ (18,867,702)

The difference between book basis and tax basis unrealized appreciation and undistributed income is due to the timing difference, and other temporary differences, in recognizing dividends paid, the tax treatment of market discount amortization, and the deduction of distributions payable.

## **10. Credit Facility**

Since August 30, 2017, Bank of New York Mellon and the Aquila Group of Funds (comprised of nine funds) have been parties to a \$40 million credit agreement, which currently terminates on August 23, 2023 (per the August 24, 2022 amendment). In accordance with the Aquila Group of Funds Guidelines for Allocation of Committed Line of Credit, each fund is responsible for payment of its proportionate share of

- a) a 0.17% per annum commitment fee; and,
- b) interest on amounts borrowed for temporary or emergency purposes by the fund (at the applicable per annum rate selected by the Aquila Group of Funds at the time of the borrowing of either (i) the adjusted daily simple Secured Overnight Financing Rate ("SOFR") plus 1% or (ii) the sum of the higher of (a) the Prime Rate, (b) the Federal Funds Effective Rate, or (c) the adjusted daily simple Secured Overnight Financing Rate plus 1%).

There were no borrowings under the credit agreement during the year ended March 31, 2023.

### 11. Risks

Mutual fund investing involves risk and loss of principal is possible. The market prices of the Fund's securities may rise or decline in value due to general market conditions, such as real or perceived adverse economic, political or regulatory conditions, recessions, inflation, changes in interest rates, lack of liquidity in the bond markets, the spread of infectious illness or other public health issues, armed conflict including Russia's military invasion of Ukraine, sanctions against Russia, other nations or individuals or companies and possible countermeasures, market disruptions caused by tariffs, trade disputes or other factors, or adverse investor sentiment. When market prices fall, the value of your investment may go down. In the past several years, financial markets have experienced increased volatility, depressed valuations, decreased liquidity and heightened uncertainty. These conditions may continue, recur, worsen or spread. Recently, inflation and interest rates have increased and may rise further. These circumstances could adversely affect the value and liquidity of the Fund's investments, impair the Fund's ability to satisfy redemption requests, and negatively impact the Fund's performance. Raising the ceiling on U.S. government debt has become increasingly politicized. Any failure to increase the ceiling on U.S. government debt could lead to a default on U.S. government obligations, with unpredictable consequences for economies and markets.

The global pandemic of the novel coronavirus respiratory disease designated COVID-19 has resulted in major disruption to economies and markets around the world, including the United States. Global financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted. Liquidity for many instruments has been greatly reduced for periods of time. Some sectors of the economy and individual issuers have experienced particularly large losses. These circumstances may continue to affect adversely the value and liquidity of the Fund's investments. Following Russia's invasion of Ukraine, Russian securities have lost all, or nearly all, their market value. Other securities or markets could be similarly affected by past or future geopolitical or other events or conditions.

# 46 | Aquila Tax-Free Fund For Utah

Governments and central banks, including the U.S. Federal Reserve, have taken extraordinary and unprecedented actions to support local and global economies and the financial markets. These actions have resulted in significant expansion of public debt, including in the U.S. The consequences of high public debt, including its future impact on the economy and securities markets, may not be known for some time.

The U.S. and other countries are periodically involved in disputes over trade and other matters, which may result in tariffs, investment restrictions and adverse impacts on affected companies and securities. For example, the U.S. has imposed tariffs and other trade barriers on Chinese exports, has restricted sales of certain categories of goods to China, and has established barriers to investments in China. Trade disputes may adversely affect the economies of the U.S. and its trading partners, as well as companies directly or indirectly affected and financial markets generally. If the political climate between the U.S. and China does not improve or continues to deteriorate, if China were to attempt unification of Taiwan by force, or if other geopolitical conflicts develop or get worse, economies, markets and individual securities may be severely affected both regionally and globally, and the value of the Fund's assets may go down.

The value of your investment will generally go down when interest rates rise. A rise in interest rates tends to have a greater impact on the prices of longer term or longer duration securities. In recent years, interest rates and credit spreads in the U.S. have been at historic lows. The U.S. Federal Reserve has raised certain interest rates, and interest rates may continue to go up. A general rise in interest rates may cause investors to move out of fixed income securities on a large scale and could also result in increased redemptions from the Fund.

Investments in the Fund are subject to possible loss due to the financial failure of the issuers of underlying securities and their inability to meet their debt obligations.

The value of municipal securities can be adversely affected by changes in the financial condition of one or more individual municipal issuers or insurers of municipal issuers, regulatory developments, legislative actions, and by uncertainties and public perceptions concerning these and other factors. The Fund may be affected significantly by adverse economic, political or other events affecting state and other municipal issuers in which it invests, and may be more volatile than a more geographically diverse fund. The municipal bond market can be susceptible to unusual volatility, particularly for lowerrated and unrated securities. Liquidity can be reduced unpredictably in response to overall economic conditions or credit tightening. Municipal issuers may be adversely affected by rising health care costs, increasing unfunded pension liabilities, and by the phasing out of federal programs providing financial support. Unfavorable conditions and developments relating to projects financed with municipal securities can result in lower revenues to issuers of municipal securities, potentially resulting in defaults. Municipal securities may be more susceptible to downgrades or defaults during a recession or similar periods of economic stress. Financial difficulties of municipal issuers may continue or get worse, particularly in the event of political, economic or market turmoil or a recession.

A portion of income may be subject to local, state, Federal and/or alternative minimum tax. Capital gains, if any, are subject to capital gains tax.

These risks may result in share price volatility.

### Additional Information:

#### Statement Regarding Liquidity Risk Management Program

Rule 22e-4 under the Investment Company Act of 1940, as amended, requires open-end management investment companies to adopt and implement written liquidity risk management programs that are reasonably designed to assess and manage liquidity risk. Liquidity risk is defined in the rule as the risk that a fund could not meet requests to redeem shares issued by the fund without significant dilution of remaining investors' interests in the fund. In accordance with Rule 22e-4, Aquila Municipal Trust ("AMT") has adopted a Liquidity Risk Management ("LRM") program (the "program"). AMT's Board of Trustees (the "Board") has designated an LRM Committee consisting of employees of Aquila Investment Management LLC as the administrator of the program (the "Committee").

The Board met on June 17, 2022 to review the program. At the meeting, the Committee provided the Board with a report that addressed the operation of the program and assessed its adequacy and effectiveness of implementation, and any material changes to the program (the "Report"). The Report covered the period from May 1, 2021 through April 30, 2022 (the "Reporting Period").

During the Reporting Period, the Committee reviewed whether each Fund's strategy is appropriate for an open-end fund structure taking into account less liquid and illiquid assets.

The Committee reviewed each Fund's short-term and long-term cash flow projections during both normal and reasonably foreseeable stressed conditions. In classifying and reviewing each Fund's investments, the Committee considered whether trading varying portions of a position in a particular portfolio investment or asset class in sizes the Fund would reasonably anticipate trading, would be reasonably expected to significantly affect liquidity. The Committee considered the following information when determining the sizes in which each Fund would reasonably anticipate trading: historical net redemption activity, the Fund's concentration in an issuer, shareholder concentration, Fund performance, Fund size, and distribution channels.

The Committee considered each Fund's holdings of cash and cash equivalents, as well as borrowing arrangements. The Committee considered the terms of the credit facility applicable to the Funds, the financial health of the institution providing the facility and the fact that the credit facility is shared among multiple Funds. The Committee also considered other types of borrowing available to the Funds, such as the ability to use interfund lending arrangements.

The Committee also performed an analysis to determine whether a Fund is required to maintain a Highly Liquid Investment Minimum ("HLIM"), and determined that the requirement to maintain an HLIM was inapplicable to the Funds because each Fund primarily holds highly liquid investments.

There were no material changes to the program during the Reporting Period. The Report provided to the Board stated that the Committee concluded that the program is reasonably designed and operated effectively throughout the Review Period.

### Your Fund's Expenses (unaudited)

As a Fund shareholder, you may incur two types of costs: (1) transaction costs, including front-end sales charges with respect to Class A shares or contingent deferred sales charges ("CDSC") with respect to Class C shares; and (2) ongoing costs including management fees; distribution "12b-1" and/or service fees; and other Fund expenses. The table below is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The table below assumes a \$1,000 investment held for the six months indicated.

# Actual Fund Expenses

The table provides information about actual account values and actual expenses. You may use the information provided in this table, together with the amount you invested, to estimate the expenses that you paid over the period. To estimate the expenses that you paid on your account, divide your ending account value by \$1,000 (for example, an \$8,600 ending account value divided by \$1,000 = 8.6), then multiply the result by the number under the heading "Expenses Paid During the Period".

# Hypothetical Example for Comparison with Other Funds

Under the heading, "Hypothetical" in the table, information is provided about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. This information may not be used to estimate the actual ending account balance or expenses you paid for the period, but it can help you compare ongoing costs of investing in the Fund with those of other funds. To do so, compare this 5% hypothetical example for the class of shares you hold with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that expenses shown in the table are meant to highlight ongoing costs and do not reflect any transactional costs. Therefore, information under the heading "Hypothetical" is useful comparing ongoing costs only, and will not help you compare total costs of owning different funds. In addition, if transactional costs were included, your total costs would have been higher.

		Actual		Hypothetical		
	(actual return after expenses)			(5% annual return before expenses)		
Share Class	Beginning Account Value 10/1/22	Ending <sup>(1)</sup> Account Value 3/31/23	Expenses <sup>(2)</sup> Paid During Period 10/1/22 – 3/31/23	Ending Account Value 3/31/23	Expenses <sup>(2)</sup> Paid During Period 10/1/22 – 3/31/23	Net Annualized Expense Ratio
A	\$1,000	\$1,054.80	\$4.51	\$1,020.54	\$4.43	0.88%
С	\$1,000	\$1,050.70	\$8.59	\$1,016.55	\$8.45	1.68%
F	\$1,000	\$1,055.80	\$3.38	\$1,021.64	\$3.33	0.66%
Y	\$1,000	\$1,054.70	\$3.48	\$1,021.54	\$3.43	0.68%

(1) Assumes reinvestment of all dividends and capital gain distributions, if any, at net asset value and does not reflect the deduction of the applicable sales charges with respect to Class A or the applicable CDSC with respect to Class C shares. Total return is not annualized and as such, it may not be representative of the total return for the year.

(2) Expenses are equal to the annualized expense ratio for the six-month period as indicated above - in the far right column - multiplied by the simple average account value over the period indicated, and then multiplied by 182/365 to reflect the one-half year period.

# Information Available (unaudited)

#### Annual and Semi-Annual Reports and Complete Portfolio Holding Schedules

Your Fund's Annual and Semi-Annual Reports are filed with the SEC twice a year. Each Report contains a complete Schedule of Portfolio Holdings, along with full financial statements and other important financial statement disclosures. Additionally, your Fund files a complete Schedule of Portfolio Holdings with the SEC for the first and third quarters of each fiscal year as an exhibit to its Reports on Form N-PORT. Your Fund's Annual and Semi-Annual Reports and N-PORT reports are available free of charge on the SEC website at <u>www.sec.gov</u>. You may also review or, for a fee, copy the forms at the SEC's Public Reference Room in Washington, D.C. or by calling 1-800-SEC-0330.

In addition, your Fund's Annual and Semi-Annual Reports and complete Portfolio Holdings Schedules for each fiscal quarter end are also available, free of charge, on your Fund's website, <u>www.aquilafunds.com</u> (under the prospectuses & reports tab) or by calling us at 1-800-437-1000.

#### **Portfolio Holdings Reports**

In accordance with your Fund's Portfolio Holdings Disclosure Policy, the Manager also prepares a Portfolio Holdings Report as of each quarter end, which is typically posted to your Fund's individual page at <u>www.aquilafunds.com</u> by the 15th day after the end of each calendar quarter. Such information will remain accessible until the next Portfolio Holdings Report is made publicly available by being posted to <u>www.aquilafunds.com</u>. The quarterly Portfolio Holdings Report may be accessed, free of charge, by visiting <u>www.aquilafunds.com</u> or calling us at 1-800-437-1000.

#### **Proxy Voting Record (unaudited)**

During the 12 month period ended June 30, 2022, there were no proxies related to any portfolio instruments held by the Fund. As such, the Fund did not vote any proxies. Applicable regulations require us to inform you that the Fund's proxy voting information is available on the SEC website at <u>www.sec.gov.</u>

#### Federal Tax Status of Distributions (unaudited)

This information is presented in order to comply with a requirement of the Internal Revenue Code. No action on the part of shareholders is required.

For the fiscal year ended March 31, 2023, \$8,124,346 of dividends paid by Aquila Tax-Free Fund For Utah, constituting 98.9% of total dividends paid, were exempt-interest dividends; and the balance was ordinary income.

Prior to February 15, 2024, shareholders will be mailed the appropriate tax form(s) which will contain information on the status of distributions paid for the **2023 calendar year.**
