

AQUILA
GROUP OF FUNDS®

Tax-Free Fund For Utah

State Specific Municipal Bond Fund

Portfolio information as of April 30, 2012

Objective & Strategy

- Seeks to provide the highest level of income exempt from regular federal and state income taxes, as is consistent with preservation of capital.
- Invests primarily in municipal obligations issued in Utah.
- Invests in investment-grade bonds; those in the four highest rating categories, or determined to be of comparable quality.

Investor Profile

The fund may be suitable for investors seeking:

- income exempt from both federal and state regular income taxes
- a high quality portfolio of municipal bonds
- a portfolio of long-term average maturity

Credit Ratings³

Maturity Allocation

Information regarding holdings is subject to change and is not necessarily representative of the entire portfolio.

Mutual fund investing involves risk; loss of principal is possible. Investments in bonds may decline in value due to rising interest rates, a real or perceived decline in credit quality of the issuer, borrower, counterparty, or collateral, adverse tax or legislative changes, court decisions, market or economic conditions. Fund performance could be more volatile than that of funds with greater geographic diversification. Insurance on an obligation is intended to mitigate credit risk; it does not insure the market price of the obligation.

¹ Modified duration measures change in the value of a security in response to a change in interest rates.

² Alternative minimum tax (AMT).

³ Independent rating services (such as Standard & Poor's, Moody's and Fitch) assign ratings, which generally range from AAA (highest) to D (lowest), to indicate the credit worthiness of the underlying bonds in the portfolio. Where the independent rating services differ in the rating they assign to an issue, or do not provide a rating for an issue, the highest available rating is used in calculating allocations by rating. Non-rated bonds are holdings that have not been rated by a nationally recognized statistical rating organization.

Performance data represents past performance, but does not guarantee future results. Investment return and principal value will fluctuate; shares, when redeemed, may be worth more or less than their original cost; current performance may be lower or higher than the data presented. Class A shares have a maximum sales charge of 4.00%; Class C shares have no initial sales charge, but a 1.00% contingent deferred sales charge applies to Class C shares redeemed within 12 months of their purchase date. Class Y shares have no initial or contingent deferred sales charge. Class A MOP returns reflect deduction of the maximum 4.00% sales charge; Class A NAV returns do not reflect deduction of the sales charge and would be lower if that charge were reflected. Class C returns without CDSC do not reflect deduction of the 1% CDSC applicable in the first 12 months; if applied, the CDSC would reduce the performance quoted. Management has contractually undertaken to waive fees and/or reimburse Fund expenses through October 31, 2012. Management has also undertaken to voluntarily waive additional fees and/or expenses. Returns would be less if full management fees and expenses were applied.

Taxable Equivalent Yield

Class A Year-End NAV Since Inception

The Taxable Equivalent Yield chart is for illustrative purposes only and does not represent past or future performance of any investment. The taxable equivalent yields are based on the month-end distribution rate of the Class A shares. The combined effective tax rate represents the marginal federal income tax rate combined with the highest state income tax rate at the corresponding income level. Yields for other share classes will vary. For certain investors, some dividends may be subject to Federal and state income taxes, including the Alternative Minimum Tax (AMT). Please consult your professional tax advisor.
