## Investment Objective

The Fund's objective is capital appreciation.

## Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.** If you invest in Class A Shares, you may qualify for sales charge discounts if you and your immediate family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other funds in the Aquila Group of Funds. More information about these and other discounts is available from your financial advisor and under "Alternative Purchase Plans" on page 31 of the Fund's Prospectus, "Sales Charges - Class A Shares" on page 33 of the Prospectus, "Broker-Defined Sales Charge Waiver Policies" on page 50 of the Prospectus, and "Purchase, Redemption, and Pricing of Shares" on page 53 of the Statement of Additional Information (the "SAI"). If you invest in Class F Shares or Class Y Shares, you may be required to pay a commission to a broker, which is not reflected in the Expense Example.

	Class A Shares	Class C Shares	Class F Shares	Class I Shares	Class Y Shares
<b>Shareholder Fees (fees paid directly from your investment)</b>

<b>Annual Fund Operating Expenses (Expenses that you pay each year as a percentage of the value of your investment)</b>

(1) Shareholders who purchase \$1 million or more of Class A Shares do not pay an initial sales charge but may pay a contingent deferred sales charge of up to 1% for redemptions within 18 months of purchase.

## Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Six years after the date of purchase, Class C Shares automatically convert to Class A Shares. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$589	\$932	\$1,299	\$2,328
Class C Shares	\$338	\$733	\$1,255	\$2,367
Class F Shares	\$132	\$412	\$ 713	\$1,568
Class I Shares	\$167	\$517	\$ 892	\$1,944
Class Y Shares	\$139	\$434	\$ 750	\$1,646

You would pay the following expenses if you did not redeem your Class C Shares:

Class C Shares	\$238	\$733	\$1,255	\$2,367
----------------	-------	-------	---------	---------

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 102% of the average value of its portfolio.

## Principal Investment Strategies

The Fund invests primarily in equity securities of U.S. issuers. The Fund invests, under normal circumstances, at least 70% of its net assets in equity securities believed to have the potential for capital appreciation. In addition to common stocks, exchange traded funds that invest primarily in equity securities, warrants, convertible bonds and preferred stock are considered equity securities for purposes of the Fund's 70% policy.

The Fund's investment strategy focuses on factors specific to each investment, including: internal changes to the company or external changes in the company's environment that drive improving balance sheet, cash flow, or earnings growth; hidden or unappreciated value; management quality; and a strong business model. The Fund invests in equity securities that can be characterized as "growth" or "value," as both kinds of companies may have characteristics that make the investment attractive. The Fund invests in a range of stock market capitalizations that could include small-cap, mid-cap, and large cap. Companies favored in the research process are those viewed to be fiscally responsible and demonstrating management alignment with shareholder value, qualities that have the potential to deliver benefits to investors. Mid-cap companies have typically represented a large portion of the companies identified by the research process. Although the Fund may invest in securities of companies of any market capitalization, the Fund typically invests a substantial portion of its assets in the securities of mid-cap companies.

The Fund may invest up to 15% of its net assets in foreign securities.

The Fund may also hold cash or other short-term investments.

## Principal Risks

You may lose money by investing in the Fund. Following is a summary description of certain risks of investing in the Fund.

**Market Risk.** The market prices of securities or other assets held by the Fund may go up or down, sometimes rapidly or unpredictably, due to general market conditions, such as real or perceived adverse economic, political, or regulatory conditions, political instability, recessions, inflation, changes in interest or currency rates, lack of liquidity in the bond markets, the spread of infectious illness or other public health issues, armed conflict, market disruptions caused by tariffs, trade disputes, sanctions or other government actions, or other factors or adverse investor sentiment. When market prices fall, the value of your investment will likely go down. A change in financial condition or other event affecting a single issuer or market may adversely impact securities markets as a whole.

In the past decade, financial markets throughout the world have experienced increased volatility, depressed valuations, decreased liquidity and heightened uncertainty. Governmental and non-governmental issuers have defaulted on, or been forced to restructure, their debts. These conditions may continue, recur, worsen or spread. Events that have contributed to these market conditions include, but are not limited to, major cybersecurity events; geopolitical events (including wars, terror attacks and economic sanctions); global pandemics; measures to address budget deficits; downgrades of sovereign debt; changes in oil and commodity prices; dramatic changes in currency exchange rates; and public sentiment. The fallout from the COVID-19 pandemic and subsequent variants of COVID-19, and the long-term impact on economies, markets, industries and individual issuers, are not known. Some sectors of the economy and individual issuers have experienced or may experience particularly large losses. Periods of extreme volatility in the financial markets; reduced liquidity of many instruments; and disruptions to supply chains, consumer demand and employee availability, may continue for some time.

Raising the ceiling on U.S. government debt has become increasingly politicized. Any failure to increase the total amount that the U.S. government is authorized to borrow could lead to a default on U.S. government obligations, with unpredictable consequences for economies and markets in the U.S. and elsewhere. Recently, inflation and interest rates have increased and may rise further. These circumstances could adversely affect the value and liquidity of the Fund's investments, impair the Fund's ability to satisfy redemption requests, and negatively impact the Fund's performance. Following Russia's invasion of Ukraine, Russian securities have lost all, or nearly all, their market value. Other securities or markets could be similarly affected by past or future political, geopolitical or other events or conditions.

Governments and central banks, including the U.S. Federal Reserve, have taken extraordinary and unprecedented actions to support local and global economies and the financial markets. These actions have resulted in significant expansion of public debt, including in the U.S. The consequences of high public debt, including its future impact on

the economy and securities markets, may not be known for some time. U.S. Federal Reserve or other U.S. or non-U.S. governmental or central bank actions, including increases or decreases in interest rates, or contrary actions by different governments, could negatively affect financial markets generally, increase market volatility and reduce the value and liquidity of securities in which the Fund invests.

The U.S. and other countries are periodically involved in disputes over trade and other matters, which may result in tariffs, investment restrictions and adverse impacts on affected companies and securities. For example, the U.S. has imposed tariffs and other trade barriers on Chinese exports, has restricted sales of certain categories of goods to China, and has established barriers to investments in China. Trade disputes may adversely affect the economies of the U.S. and its trading partners, as well as companies directly or indirectly affected and financial markets generally. The U.S. government has prohibited U.S. persons, such as the Fund, from investing in Chinese companies designated as related to the Chinese military. These and possible future restrictions could limit the Fund's opportunities for investment and require the sale of securities at a loss or make them illiquid. Moreover, the Chinese government is involved in a longstanding dispute with Taiwan that has included threats of invasion. If the political climate between the U.S. and China does not improve or continues to deteriorate, if China were to attempt unification of Taiwan by force, or if other geopolitical conflicts develop or get worse, economies, markets and individual securities may be severely affected both regionally and globally, and the value of the Fund's assets may go down.

Economies and financial markets throughout the world are increasingly interconnected. Economic, financial or political events, trading and tariff arrangements, armed conflict including Russia's military invasion of Ukraine, terrorism, natural disasters, infectious illness or public health issues, cybersecurity events, supply chain disruptions, sanctions against Russia, other nations or individuals or companies and possible countermeasures, and other circumstances in one country or region could have profound impacts on other countries or regions and on global economies or markets. As a result, whether or not the Fund invests in securities of issuers located in or with significant exposure to the countries or regions directly affected, the value and liquidity of the Fund's investments may be negatively affected. The Fund may experience a substantial or complete loss on any security or investment.

**Equity Securities Risk.** Securities fluctuate in price based on changes in a company's financial condition and overall market and economic conditions. The market price of an individual security or particular type of security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole.

**Foreign Securities Risk.** Foreign securities are subject to a number of additional risks, including nationalization or expropriation of assets, imposition of currency controls or restrictions, confiscatory taxation, political or financial instability, military conflicts and sanctions, terrorism, arbitrary application of laws and regulations or lack of rule of law, and other adverse economic or political developments. Lack of information and less market regulation may also affect the value of these securities. Risks are greater for investments in emerging markets. Emerging market countries tend to have economic, political and legal systems that are less fully developed and are less stable than those of more advanced countries. Low trading volumes may result in a lack of liquidity and in extreme price volatility. The value of investments in securities denominated in foreign currencies increases or decreases as the rates of exchange between those currencies and the U.S. dollar change. Currency exchange rates can be volatile, and are affected by factors such as general economic conditions, the actions of the U.S. and foreign governments or central banks, the imposition of currency controls and speculation. Sanctions or other government actions against certain countries could negatively impact the Fund's investments in securities that have exposure to those countries. Circumstances that impact one country could have profound impacts on other countries and on global economies or markets.

**Small and Mid-Sized Companies.** Companies having market capitalization of middle to smaller size are comparatively less well known and may have less trading in their shares than larger companies. Compared to large companies, small-and mid-size companies, and the market for their equity securities, may be more sensitive to changes in earnings results and investor expectations or poor economic or market conditions, including those experienced during a recession, have more limited product lines, operating histories and capital resources, may be dependent upon a limited management group, experience sharper swings in market values, have limited liquidity, be harder to value or to sell at the times and prices Aquila Investment Management LLC (the "Manager") thinks appropriate, and offer greater potential for gain and loss. The Fund invests in companies that are highly leveraged. Leverage can magnify the impact of adverse economic, political, regulatory and other developments on a company's operations and market value.

**Liquidity Risk.** The Fund may make investments that are illiquid or become illiquid after purchase, including investments in securities issued in private placement transactions. Illiquid assets may also be difficult to value. Liquidity risk may be magnified in an environment of rising interest rates or widening credit spreads. If the Fund is forced to sell an illiquid security to meet redemption requests or other cash needs, the Fund may be forced to sell the security at a substantial loss or may not be able to sell at all. The Fund may not receive its proceeds from the sale of certain securities for an extended period (for example, several weeks or even longer). In extreme cases, this may constrain the Fund's ability to meet its obligations (including obligations to redeeming shareholders).

**Portfolio Turnover Risk.** If the Fund does a lot of trading, it may incur additional operating expenses and other costs, which would reduce performance. Trading activity could also cause shareholders to incur a higher level of taxable income or capital gains.

**Portfolio Selection Risk.** The value of your investment may decrease if the Manager's judgment about the attractiveness, quality, relative yield, value or market trends affecting a particular sector or region, market segment, security, industry, sector or region, or about market movements or interest rates or other factors, is incorrect, or there may be imperfections, errors or limitations in the models, tools and information used by the Manager.

**Valuation Risk.** The sales price the Fund could receive for any particular portfolio investment may differ from the Fund's valuation of the investment, particularly for securities that trade in thin or volatile markets or that are valued using a fair value methodology. These differences may increase significantly and affect Fund investments more broadly during periods of market volatility. Investors who purchase or redeem Fund shares on days when the Fund is holding fair-valued securities may receive fewer or more shares or lower or higher redemption proceeds than they would have received if the securities had not been fair-valued or if a different valuation methodology had been used. The Fund's ability to value its investments may be impacted by technological issues and/or errors by pricing services or other third party service providers.

**Redemption Risk.** The Fund may experience heavy redemptions that could cause the Fund to liquidate its assets at inopportune times or at a loss or depressed value or accelerate taxable gains or transaction costs, which could cause the value of your investment to decline.

**Cybersecurity Risk.** Cybersecurity failures by and breaches of the Fund's Manager, Transfer Agent, Custodian, Distributor or other service providers may disrupt Fund operations, interfere with the Fund's ability to calculate its NAV, prevent Fund shareholders from purchasing, redeeming or exchanging shares or receiving distributions or receiving timely information regarding the Fund or their investment in the Fund, cause loss of or unauthorized access to private shareholder information, or result in financial losses to the Fund and its shareholders, regulatory fines, penalties, reputational damage, or additional compliance costs.

These risks are discussed in more detail in the Prospectus or in the SAI.

## Fund Performance

The following bar chart and table provide some indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year and by showing how the Fund's average annual total returns for the designated periods compare with those of a broad measure of market performance. No performance information is presented for Class F Shares because Class F Shares do not have annual returns for at least one calendar year. The returns for Class F Shares would differ from the returns shown because Class F Shares have different expenses. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at [www.aquilafunds.com](http://www.aquilafunds.com) or by calling **800-437-1000 (toll-free)**.
